Constellations Govert Schilling,2019-06-04 Perfect for stargazers and armchair astronomers of all ages, CONSTELLATIONS is a beautifully illustrated, fascinating guide to all 88 constellations, including an illustrated star map for each. In CONSTELLATIONS, award-winning astronomy writer Govert Schilling takes us on an unprecedented visual tour of all 88 constellations in our night sky. Much more than just a stargazer's guide, CONSTELLATIONS is complete history of astronomy as told by Schilling through the lens of each constellation. The book is organized alphabetically by constellation. Profiles of each constellation include basic information such as size, visibility, and number of stars, as well as information on the discovery and naming of the constellation and associated lore. Beyond details about the constellation itself is information about every astronomical event that took place or discovery made in the vicinity of the constellation. In the constellation of Cygnus (the Swan) we encounter the location of the first confirmed black hole. A stop at Gemini (the Twins) is a chance to say hello to the dwarf planet Pluto, and in Orion (the hunter) we find the location of the first identified gamma-ray

burst. Stunning star maps throughout the book by acclaimed star mapmaker Wil Tirion show us the exact location of every constellation, the details of its structure, as well as its surrounding astronomical neighbors.

The Michael Turner Collection Chas Parker, Michael Turner, 2020-11 For over 50 years, renowned motor sport and aviation artist Michael Turner annually produced a set of paintings depicting stand-out moments from that year's Formula One and sports car racing season. The paintings were reproduced as a set of Christmas cards and made available through Michael's own company, Studio 88, which he formed in 1963. Over the years, these cards became highly-collectable to the extent that, in 1992, Michael's wife, Helen, formed a Collectors' Club which quickly gained a worldwide membership. Now, for the first time, the entire collection of cards produced between 1960 and 2016 is published together in the book, 'The Michael Turner Collection', written by Chas Parker in conjunction with Michael.

Eyes on the Skies Govert Schilling, Lars Lindberg Christensen, 2011-12-07 Adopted as the official book of the International Year of Astronomy (IYA) 2009, this stunningly illustrated history of telescopic discovery spans the range from the first telescopes via the Hubble Space Telescope to next generation platforms, and how they have changed and continue to change our view of the universe, our place in it and where it all came from. EYES ON THE SKIES features numerous full-page photographs and is printed in high-quality color throughout. Also includes the official IYA DVD with 59 minutes of narrated text, expert comments and interviews, animations, computer simulations, science results, plus footage from observatories.

Car Tourism Waldemar Cudny, 2017-07-05 This book examines the role of cars and the space connected with their production and presentation in tourism development. It describes the role played by experiences and experience societies formed in the 20th c. in the development of contemporary tourism, including tourism related to cars. The book explores the influence of experiencing unusual events, such as car races, car fairs, visits to car industry museums or multifunctional spaces connected with producing and exhibiting cars (e.g. Autostadt or Audi Forum) on the development of a new type of tourism, i.e. car tourism. This kind of tourism is novel in two ways: firstly, it is a new phenomenon in science, as so far it has not been thoroughly studied or described, apart from various short articles. Secondly, this type of tourism has developed on a large scale only in recent years, mainly due to the huge investments made by powerful European car manufacturers (e.g. Autostadt, Audi Forums, Porsche Museum, Lamborghini Museum etc.). The book presents cars and the spaces related to them as tourist assets (sites, events) and as tourist products that satisfy tourists' needs. Moreover, it connects the issue of car tourism to the marketing strategies of large car manufacturers and discusses the theory of tourism space, highlighting the main tourism spaces in which car tourism develops. It presents multifunctional spaces (factories, adventure centres – Autostadt in Wolfsburg), museums, car exhibitions, and race tracks. In the next chapter, following an introduction to the problem of events, the author describes events related to car tourism, including races, rallies, driving schools and car fairs.

The book ends with a summarizing chapter, which includes a model of the function of car tourism as a separate type of tourism, as well as a discussion presenting the main features, advantages and disadvantages of car tourism in the context of the tourism space theory.

Lamborghini Luca Molinari, Raffaello Porro, 2014 To celebrate Lamborghini's first 50 years, authors and professionals from different fields narrate its history, present, and future in a completely new way. Lamborghini, one of the most famous and iconic of all automobile brands, will turn 50 in 2013 (1963 - 2013). Over the course of this half century, it has gradually established itself as a leader in its sector, integrating perfectly into the culture of its time and becoming a symbol of innovation in design and technology, as well as a phenomenon in culture and communication. This beautifully illustrated book describes every step of the journey, with references to cinema, technology, design and the work of the men who made their fortune from the brand. It is not the usual book about cars written for car enthusiasts, but a broader and more complex project with six carefully structured chapters (1. The history; 2. The technological innovation; 3. The design; 4. The people; 5. The image; 6. The future), accompanied by spectacular images of all the models produced up to now, revealing how Lamborghini made its way into the collective imagination and became the legend it is today. It is a large-format volume with 200 beautiful colour images, brilliantly evoking a surprising combination of tradition and innovation for all those who are interested in design, technology, material culture, communication and, of course, the classic qualities of Italian manufacture at its best.

Invisible Universe Stephen M. Pompea, Alan Gould, Lincoln Bergman, 2002 The 5 class sessions, of 45-60 minutes each, deepen student understanding of the electromagnetic spectrum, enabling students to detect and consider wavelengths other than visible light. Activities feature energy stations, including infrared (TV remote); microwave (pager); ultraviolet (black light) and other devices. Students come up with their own tests to see what blocks each wavelength, and what does not. They learn how these other wavelengths can be used to see things we cannot see with our eyes.

The Complete Book of Porsche 911 Randy Leffingwell, 2019-07-30 Porsche's fabled 911 represents the ultimate expression of Ferdinand Porsche's original vision of the perfect sports car. In *The Complete Book of Porsche 911*, author and photographer Randy Leffingwell provides a year-by-year overview of Stuttgart's most famous car, from the original 901 prototype to today's technologically advanced GT2 and GT3 derivatives and the latest 992-generation 911. Along the way, he highlights the racing, prototype, and limited-production cars—offering the most complete reference available to these top-tier sports cars. In this book, you'll find the air-cooled cars of 1963 to 1998, then the water-cooled 911s of 1998 to present day. With behind-the-scenes info on the evolution of this iconic sports car, this book offers the detail craved by Porsche enthusiasts. Illustrated throughout with images from Porsche's own historical archive and complemented by the author's stunning photos, along with detailed technical specification tables, *The Complete Book of Porsche 911* offers a thorough

account of one of the most beloved enthusiast cars ever produced.

Standard Catalog of American Cars, 1805-1942 Beverly Rae Kimes,1996 This new revised and updated edition is the ultimate buyer's/seller's/user's guide for American automobiles manufactured from 1805 to 1942. With more than 5,000 photos and histories of cars and their companies written by one of America's most respected automotive historians, this is the most extensive automobile reference available.

Deep Space Govert Schilling,2024-07-16 Join award-winning astronomy writer Govert Schilling on a journey through space and time to the most far-reaching corners of the universe in this stunning photographic voyage into deep space. This one-of-a-kind trip begins inside our own solar system with a brief tour of the sun, the planets and their moons, asteroids, comets, and dwarf planets. We then accelerate into deep space and, with Schilling as our guide, we explore the birth of stars in the Orion and Carina Nebulae; the death of stars, from red giants to catastrophic supernova explosions; and galaxies and galaxy clusters beyond our own including spiral galaxies, elliptical galaxies, and lenticular galaxies. We learn about supermassive black holes, which astronomers now believe exist at the center of every galaxy including our own, and exoplanets, billions of which are believed to be orbiting stars in the Milky Way and beyond. The book concludes at the edge of the cosmological horizon with a look at dark matter, dark energy, and theories of extraterrestrial life and the Multiverse. With hundreds of photographs, including new images from the James Webb Space Telescope, and custom illustrations throughout, as well as a star atlas that shows the full celestial sky, *Deep Space* is the perfect book for astronomy buffs, students, and anyone fascinated with the mystery and beauty of the cosmos.

Braby's Commercial Directory of Southern Africa ,1991

Not Quite What I Was Planning Larry Smith,Rachel Fershleiser,2009-10-13 Deceptively simple and surprisingly addictive, *Not Quite What I Was Planning* is a thousand glimpses of humanity—six words at a time. One Life. Six Words. What's Yours? When Hemingway famously wrote, *For Sale: baby shoes, never worn*, he proved that an entire story can be told using a half dozen words. When the online storytelling magazine SMITH asked readers to submit six-word memoirs, they proved a whole, real life can be told this way too. The results are fascinating, hilarious, shocking, and moving. From small sagas of bittersweet romance (Found true love, married someone else) to proud achievements and stinging regrets (After Harvard, had baby with crackhead), these terse true tales relate the diversity of human experience in tasty bite-sized pieces. From authors Jonathan Lethem and Richard Ford to comedians Stephen Colbert and Amy Sedaris, to ordinary folks around the world, everyone has a six-word story to tell.

Lamborghini David Jolliffe,Tony Willard,2004 For 40 years, Lamborghini has been one of the world's most flamboyant and exotic car marques. Written by a long-term Lamborghini insider, the book tells, for the first time, the real story of the

men who kept the Italian company alive, making cars bought by wealthy business executives, show business celebrities, and sports stars. Custodians of Lamborghini have included Chrysler and businessmen in Switzerland and Asia. Now Lamborghini sits alongside Bugatti at Audi, part of the Volkswagen Group. Previous Lamborghini books have been little more than collections of pictures of the cars and technical descriptions, but this one describes the character of the men whose passion for Lamborghini kept the company alive. The book is published in 2004 as the all-new Lamborghini Gallardo goes on sale, 41 years after the original 350GTV burst onto the scene at the Turin auto show.

Driving Ambition Doug Nye, Ron Dennis, Gordon Murray, 1999 This history of the McLaren F1 explains how the McLaren Cars' team pursued their quest for perfection to create the fastest road car in the world - setting the record at 240.1mph in 1998. The book has been created with the full support and involvement of McLaren Cars.

Making It Faster Norman L. DeWitt, Dan Binks, 2013-11 In motorsports there have been an endless series of performance advances where one wonders, how did they ever figure this out? Other times one asks, how did they not see this when the answer was there for all to see? These are the stories of discovery by 3 generations of racers and designers, who changed the state of the art forever. It is also the story of clever tricks and rule book interpretation to win the ever-escalating contest between rule makers and loophole seekers, told by those directly involved in Formula One, Le Mans, Indycar, IMSA, Moto GP, Trans-Am and NASCAR. Their innovations dazzled us all.
