**Wheels** Arthur Hailey,2014-05-13 Master storyteller Arthur Hailey's #1 New York Times bestseller is a turbocharged thriller about America's automobile industry, from the bottom up Ford. Chrysler. In the shadows of these towering giants is American Motors, blazing its own path to greatness. From Detroit's inner city to its affluent suburbs, from the executive suites and secret design studios to the assembly line jungle and the maximum security testing grounds, *Wheels* is a breakneck ride full of human drama through one of America's most complex and competitive industries.

**Reinventing the Wheel** Bronwen Percival, Francis Percival, 2017-11-30 **\*\*Wine and Spirits Book of the Year 2017\*\*** A fascinating look into the world of cheese and its creators. In little more than a century, the drive towards industrial and intensive farming has altered every aspect of the cheesemaking process, from the bodies of the animals that provide the milk to the science behind the microbial strains that ferment it. Reinventing the Wheel explores what has been lost as expressive, artisanal cheeses that convey a sense of place have given way to the juggernaut of homogeneous factory production. While Bronwen and Francis Percival lament the decline of farmhouse cheese and reject the consequences of industrialisation, this book's message is one of optimism. Scientists have only recently begun to reveal the significance of the healthy microbial communities that contribute to the flavour and safety of cheese, while local producers are returning to the cheese-making methods of their parents and grandparents. This smart, engaging book sheds light on the surprising truths and science behind the dairy industry. Discover how, one experiment at a time, these dynamic communities of researchers and cheesemakers are reinventing the wheel.

**Safety Cases and Safety Reports** Richard Maguire, 2017-05-15 The safety case and its associated reports are quickly becoming not only a mechanism for achieving safety goals, but also a valuable decision-support asset, and a vital industrial liability management tool. Recent developments in industry have led to safety cases being frequently required as contractual deliverables as part of large and complex commercial programmes. A safety case consists of a rational argument and detailed evidence to justify and demonstrate that a system or product is tolerably safe in its use, and that it has a management programme to ensure that this remains so. The safety case report is the snap-shot presentation of the arguments and evidence demonstrating the contemporary safety performance of the system and the programme that is in place. This book, written from personal experience and reference, provides a concentrated source document for assessing and constructing safety cases and safety case reports - from understanding their purposes, through their development and on to their presentation.
