*Rail 2020* Great Britain: Parliament: House of Commons: Transport Committee, 2013-01-04 In this report setting out their vision for the railway by 2020 the Transport Committee endorses the quest for a more efficient railway but raises concerns about safety, staffing and the protection of passenger interests. The Committee calls for: clarity about the purpose and effectiveness of rail subsidies; a clear link between policy on rail and other aspects of transport policy; a strategic approach to policy-making which does not sacrifice democratic accountability, takes passenger interests more clearly into account, upholds safety standards and develops a strategy for improving the security of the rail network; greater transparency about the costs of rail to ensure that new investment, operator alliances, profit or wastage levels and various forms of franchise can be better compared and evaluated; more modern, flexible fares and ticketing options and a clear long-term policy on regulated fares that rules out even higher fares for commuters on peak time trains; a strong single economic regulator for the rail industry; effective industry leadership via the Rail Delivery Group, scrutinised closely by the regulator to ensure that this strategic body acts in the best interests of the farepayer and taxpayer, rather than simply of established rail interests; devolution for some rail franchises to local or regional bodies. The Committee recommends that the Rail Delivery Group, made up of senior industry leaders, should spearhead the swift implementation of innovative ticketing technology and work with Passenger Focus to develop a clear strategy for improving retail facilities on stations and trains.

**Understanding Management in China** Malcolm Warner, 2013-11-12 China has become one of the fastest-growing economies ever seen in the world in recent times. In the last three decades, China has transformed itself from a command economy to a market one, albeit a nominally socialist one, and its management systems have been reformed accordingly. In the light of these changes, Malcolm Warner, one of the leading authorities on management in China, explores the past, present and future of Chinese management. The first part of the work examines the history of management practices in the 'Middle Kingdom', outlining the influence of traditional Chinese values, especially the Confucian inheritance, and the legacy of the imperial bureaucracy with its meritocratic examination system, as well as the role of industrialization and the influx of foreign-owned businesses in the late nineteenth century and the twentieth century. It next goes on to consider the current

state of China's management, showing how a new breed of manager has evolved since the beginning of Deng Xiaoping's reforms in the late 1970s and 1980s. The resulting impact of this strategy which has continued into the 1990s and the 2000s, up to the present day, is then examined. The final part of the book concludes with reflections on how management in China is likely to develop in the near future, especially on how far it will converge with global practices or to what degree an indigenous form of management 'with Chinese characteristics' will prevail.

**Fiscal Regimes for Extractive Industries—Design and Implementation** International Monetary Fund. Fiscal Affairs Dept.,2012-08-16 Better designed and implemented fiscal regimes for oil, gas, and mining can make a substantial contribution to the revenue needs of many developing countries while ensuring an attractive return for investors, according to a new policy paper from the International Monetary Fund. Revenues from extractive industries (EIs) have major macroeconomic implications. The EIs account for over half of government revenues in many petroleum-rich countries, and for over 20 percent in mining countries. About one-third of IMF member countries find (or could find) resource revenues “macro-critical” - especially with large numbers of recent new discoveries and planned oil, gas, and mining developments. IMF policy advice and technical assistance in the field has massively expanded in recent years - driven by demand from member countries and supported by increased donor finance. The paper sets out the analytical framework underpinning, and key elements of, the country-specific advice given. Also available in Arabic: ????? ?????? ?????? ?????????? ?????????? ?????????? **Regionalization of the World** Pierre Beckouche,Yann Richard,2024-04-16 On the world map, macro-regions or global regions have gradually emerged, with varying degrees of success and following different trajectories. The authors of this book attempt to determine whether, within the context of globalization, these macro-regions have become an additional level in the spatial deployment of numerous actors, and whether they have come to stand between the national and global levels. This question has arisen because the increasing scales of trade, environmental problems, migration routes, energy distribution, the construction of major infrastructures etc. transcend national boundaries and are leading states to implement

macro-regional cooperation. The authors ask whether these large regional groupings are becoming genuine territories and are the fruit of in-depth regional integration – economic, institutional, legal, normative, political, cultural and in terms of identity. If so, these global regions would therefore become referents that make sense and take root in social representations.

**Radical Left Movements in Europe** Magnus Wennerhag, Christian Fröhlich, Grzegorz Piotrowski, 2017-07-28 When the Iron Curtain lifted in 1989, it was seen by some as proof of the final demise of the ideas and aspirations of the radical left. Not many years passed, however, before the critique of social inequalities and capitalism was once again a main protest theme of social movements. This book provides an account of radical left movements in today's Europe and how they are trying to accomplish social and political change. The book's international group of leading experts provide detailed analysis on social movement organizations, activist groups, and networks that are rooted in the left-wing ideologies of anarchism, Marxism, socialism, and communism in both newly democratized post-communist and longstanding liberal-democratic polities. Through a range of case studies, the authors explore how radical left movements are influenced by their situated political and social contexts, and how contemporary radical left activism differs from both new and old social movements on one hand, and the activities of radical left parliamentary parties on the other. Ultimately, this volume investigates what it means to be 'radical left' in current day liberal-democratic and capitalist societies after the fall of European state socialism. This is valuable reading for students and researchers interested in European politics, contemporary social movements and political sociology.

**The State and the Advocate** Teresita Rosario, 2014-07-11 This book seeks to demonstrate the role of public policy in support of equitable and inclusive development. The achievement of this overarching goal rests on an assumption that

development does not happen by chance or by accident, but rather, through the deliberate application of analytical tools which public policy is able to provide. Set within an Asian context, the book emphasizes the role of public policy in reducing poverty, eliminating deprivation, promoting equity, and ensuring social justice. The book likewise aims to provide an argument for the developmental role of the state — one which has been the subject of a long-standing debate among development scholars. In addition, the book accounts for the role of civil society organizations, particularly their involvement in multi-stakeholder participation. Through different case studies, this book explains the outcome of public policy decisions as combinations of efforts among government and civil society actors, to ensure the creation of the most optimal public good. Finally, the book takes a comparative perspective, i.e., there are cases that directly or indirectly implicate the regional character of public policies that result in the creation and distribution of regional public goods.
