The Nation of Plants Stefano Mancuso, 2023-04-18 In this playful yet informative manifesto, a leading plant neurobiologist presents the eight fundamental pillars on which the life of plants—and by extension, humans—rests. Even if they behave as though they were, humans are not the masters of the Earth, but only one of its most irksome residents. From the moment of their arrival, about three hundred thousand years ago—nothing when compared to the history of life on our planet—humans have succeeded in changing the conditions of the planet so drastically as to make it a dangerous place for their own survival. The causes of this reckless behavior are in part inherent in their predatory nature, but they also depend on our total incomprehension of the rules that govern a community of living beings. We behave like children who wreak havoc, unaware of the significance of the things they are playing with. In *The Nation of Plants*, the most important, widespread, and powerful nation on Earth finally gets to speak. Like attentive parents, plants, after making it possible for us to live, have come to our aid once again, giving us their rules: the first Universal Declaration of Rights of Living Beings written by the plants. A short charter based on the general principles that regulate the common life of plants, it establishes norms applicable to all living beings. Compared to our constitutions, which place humans at the center of the entire juridical reality, in conformity with an anthropocentrism that reduces to things all that is not human, plants offer us a revolution.

thing more important than life itself: Edward Cullen. But being in love with a vampire is even more dangerous than Bella could ever have imagined. Edward has already rescued Bella from the clutches of one evil vampire, but now, as their daring relationship threatens all that is near and dear to them, they realize their troubles may be just beginning. Passionate, riveting, and full of surprising twists and turns, this vampire love saga is well on its way to literary immortality. It's here! #1 bestselling author Stephenie Meyer makes a triumphant return to the world of Twilight with the highly anticipated companion, *Midnight Sun*: the iconic love story of Bella and Edward told from the vampire's point of view. The Incredible Journey of Plants Stefano Mancuso, 2020-03-24 Named a Best Book of the Year for the Know-It-All by The Globe and Mail In this richly illustrated volume, a leading neurobiologist presents fascinating stories of plant migration that reveal unexpected connections between nature and culture. When we talk about migrations, we should study plants to understand that these phenomena are unstoppable. In the many different ways plants move, we can see the incessant action and drive to spread life that has led plants to colonize every possible environment on earth. The history of this relentless expansion is unknown to most people, but we can begin our exploration with these surprising tales, engagingly told by Stefano Mancuso. Generation after generation, using spores, seeds, or any other means available, plants move in the world to conquer new spaces. They release huge quantities of spores that can be transported thousands of miles. The number and variety of tools through which seeds spread is astonishing: we have seeds dispersed by wind, by rolling on the ground, by animals, by water, or by a simple fall from the plant, which can happen thanks to propulsive mechanisms, the swaying of the

mother plant, the drying of the fruit, and much more. In this accessible, absorbing overview, Mancuso considers how plants convince animals to transport them around the world, and how some plants need particular animals to spread; how they have been able to grow in places so inaccessible and inhospitable as to remain isolated; how they resisted the atomic bomb and the Chernobyl disaster; how they are able to bring life to sterile islands; how they can travel through the ages, as they sail around the world.

Refugee Tales Ali Smith, Marina Lewycka, Patience Agbabi, Jade Amoli-Jackson, Chris Cleave, Stephen Collis, Inua Ellams, Abdulrazak Gurnah, David Herd, Avaes Mohammed, Hubert Moore, Dragan Todorovic, Carol Watts, Michael Zand, 2016-05-31 Two unaccompanied children travel across the Mediterranean in an overcrowded boat that has been designed to only make it halfway across... A 63-year-old man is woken one morning by border officers 'acting on a tip-off' and, despite having paid taxes for 28 years, is suddenly cast into the detention system with no obvious means of escape... An orphan whose entire life has been spent in slavery - first on a Ghanaian farm, then as a victim of trafficking - writes to the Home Office for help, only to be rewarded with a jail sentence and indefinite detention... These are not fictions. Nor are they testimonies from some distant, brutal past, but the frighteningly common experiences of Europe's new underclass - its refugees. While those with 'citizenship' enjoy basic human rights (like the right not to be detained without charge for more than 14 days), people seeking asylum can be suspended for years in Kafka-esque uncertainty. Here, poets and novelists retell the stories of individuals who have direct experience of Britain's policy of indefinite immigration detention. Presenting their accounts anonymously, as modern day counterparts to the pilgrims' stories in Chaucer's *Canterbury Tales*, this book offers rare, intimate glimpses into otherwise untold suffering.

Survival In Auschwitz Primo Levi, 1996 A work by the Italian-Jewish writer, Primo Levi. It describes his arrest as a member of the Italian anti-fascist resistance during the Second World War, and his incarceration in the Auschwitz concentration camp from February 1944 until the camp was liberated on 27 January 1945.

Mathematical Lives CLAUDIO BARTOCCI, Renato Betti, Angelo Guerraggio, Roberto Lucchetti, 2010-10-01 Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications. This volume brings to the forefront some of the proponents of the mathematics of the twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who have impressive charisma and wide-ranging cultural interests, who are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers, Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle

between 'soul and precision.'

Shakespeare and Company Sylvia Beach, 1991-01-01 Sylvia Beach was intimately acquainted with the expatriate and visiting writers of the Lost Generation, a label that she never accepted. Like moths of great promise, they were drawn to her well-lighted bookstore and warm hearth on the Left Bank. Shakespeare and Company evokes the zeitgeist of an era through its revealing glimpses of James Joyce, Ernest Hemingway, Scott Fitzgerald, Sherwood Anderson, Andre Gide, Ezra Pound, Gertrude Stein, Alice B. Toklas, D. H. Lawrence, and others already famous or soon to be. In his introduction to this new edition, James Laughlin recalls his friendship with Sylvia Beach. Like her bookstore, his publishing house, New Directions, is considered a cultural touchstone.

The Bedlam Stacks Natasha Pulley, 2018-06 In 1859, ex-East India Company smuggler Merrick Tremayne is trapped at home in Cornwall after sustaining an injury that almost cost him his leg. When the India Office recruits Merrick for an expedition to fetch quinine--essential for the treatment of malaria--from deep within Peru, he knows it's a terrible idea. Nearly every able-bodied expeditionary who's made the attempt has died, and he can barely walk. But Merrick is desperate to escape the strange events plaguing his family's crumbling estate, so he sets off, against his better judgment, for the edge of the Amazon. There he meets Raphael, a priest around whom the villagers spin unsettling stories of impossible disappearances, cursed woods, and living stone. Merrick must separate truth from fairy tale, and gradually he realizes that Raphael is the key to a secret which will prove more valuable than quinine.

Socially Symbolic Acts Joseph Francese, 2006 This book discusses issues of broad cultural consequence by examining the work of three of Italy's most prominent living novelists, Umberto Eco, Vincenzo Consolo, and Antonio Tabucchi. The introductory chapter continues a discussion of some of the topics already broached in the author's *Narrating Postmodern Time and Space* (1997). It uses an approach that is both historicist and psychoanalytic to critically address topics in cultural studies and Italian studies. The book deals with fictions of very recent publication, many of which have been published after the turn of the millennium, filling important gaps in the critical bibliography. Close readings relate texts to their historical and cultural contexts, critiquing their ideology while preserving their Utopian moments.

Seeing Voices Oliver Sacks, 2011-03-04 Like *The Man Who Mistook His Wife for a Hat*, this is a fascinating voyage into a strange and wonderful land, a provocative meditation on communication, biology, adaptation, and culture. In *Seeing Voices*, Oliver Sacks turns his attention to the subject of deafness, and the result is a deeply felt portrait of a minority struggling for recognition and respect — a minority with its own rich, sometimes astonishing, culture and unique visual language, an extraordinary mode of communication that tells us much about the basis of language in hearing people as well. *Seeing Voices* is, as Studs Terkel has written, an exquisite, as well as revelatory, work.

The Double Bond Carole Angier,2002 Perhaps the most important writer to emerge from the death camps, Primo Levi is known for *Survival in Auschwitz*, *The Reawakening*, and the classic *The Periodic Table*. Angier has spent nearly ten years writing this meticulously researched, vivid, and moving biography.

The Cabaret of Plants: Forty Thousand Years of Plant Life and the Human Imagination Richard Mabey,2016-01-11 Highly entertaining...Mabey gets us to look at life from the plants' point of view. —Constance Casey, New York Times *The Cabaret of Plants* is a masterful, globe-trotting exploration of the relationship between humans and the kingdom of plants by the renowned naturalist Richard Mabey. A rich, sweeping, and wonderfully readable work of botanical history, *The Cabaret of Plants* explores dozens of plant species that for millennia have challenged our imaginations, awoken our wonder, and upturned our ideas about history, science, beauty, and belief. Going back to the beginnings of human history, Mabey shows how flowers, trees, and plants have been central to human experience not just as sources of food and medicine but as objects of worship, actors in creation myths, and symbols of war and peace, life and death. Writing in a celebrated style that the Economist calls "delightful and casually learned," Mabey takes readers from the Himalayas to Madagascar to the Amazon to our own backyards. He ranges through the work of writers, artists, and scientists such as da Vinci, Keats, Darwin, and van Gogh and across nearly 40,000 years of human history: Ice Age images of plant life in ancient cave art and the earliest representations of the Garden of Eden; Newton's apple and gravity, Priestley's sprig of mint and photosynthesis, and Wordsworth's daffodils; the history of cultivated plants such as maize, ginseng, and cotton; and the ways the sturdy oak became the symbol of British nationhood and the giant sequoia came to epitomize the spirit of America. Complemented by dozens of full-color illustrations, *The Cabaret of Plants* is the magnum opus of a great naturalist and an extraordinary exploration of the deeply intertwined history of humans and the natural world.

The Plant Messiah Carlos Magdalena,2017-06-01 Passionate, forthright and enthusiastic, Carlos Magdalena is a world-renowned horticulturist - known both for his charisma and his conservation work. *The Plant Messiah* follows Carlos' dreams and disappointments; from his days as a school boy in the death throes of General Franco's Fascist dictatorship, to his advent as *The Plant Messiah* at the forefront of conservation, backed by the reputation and resources of The Royal Botanic Gardens, Kew and enthused by the potential that lies beyond. The book discloses for the first time the details behind his 'codebreaking' exploits and the secret stories behind his work; his genius, lateral thinking and steadfast belief that everything is possible.
