Consciousness from Zombies to Angels Christian de Quincey, 2008-12-15 A user-friendly, step-by-step guide to understanding the mind • Presents a practical journey into understanding consciousness--philosophy's hardest problem, science's final frontier, and spirituality's deepest mystery • Offers 7 steps to transform your life using the shadow and the light of consciousness *Consciousness from Zombies to Angels* presents a practical, step-by-step "owner's guide" for the mind that sorts out philosophy's hardest problem, science's final frontier, and spirituality's deepest mystery--what consciousness is, how it works, and why it's important. Christian de Quincey presents seven simple steps for understanding consciousness and how it can lead to spiritual awareness: observe your language, identify the problem, learn how to look, recognize your patterns, know yourself, embrace your shadow, and practice transformation. All of us exhibit both shadow and light, aspects of ourselves we fear and deny (our inner Zombies) as well as qualities we admire and want to radiate (our inner Angels). The key to a creative and fulfilled life is to integrate both. De Quincey reveals that the way to transformation is to accept ourselves exactly as we are--a work in progress. Readers will learn the difference between "energy talk" and "consciousness talk"; how the body affects the mind, and vice versa; and where to go for help to develop consciousness, heal emotions, or grow spiritually. De Quincey shows how to recognize and break habits and patterns that run your life, how to find out who you really are, and why facing up to your darkest fears will liberate your brightest light as you learn to embrace all of your humanity and experience the power of transformation.

Radical Knowing Christian de Quincey, 2005-08-16 A radical reassessment of what we mean by consciousness and how we experience it in relation to others • Shows the importance of integrating different ways of knowing--such as feeling and intuition, reason and the senses--in our approach to life • Discusses the technique of Bohmian Dialogue where you can learn not only to feel your thinking, but also to experience true communion with others In *Radical Knowing* Christian de Quincey makes a provocative claim: We are not who we think we are. Instead, we are what we feel. Giving disciplined attention to feelings reveals the most fundamental fact of life and reality: We are our relationships. Most of us think we are individuals first and foremost who then come together to form relationships. De Quincey turns this obvious fact on its head and shows that relationship comes first, and that our individual sense of self--our private consciousness--actually arises from shared consciousness. This shared, collective consciousness is at the heart of indigenous ways of life and their worldviews. De

Quincey explains that participating in shared consciousness literally builds the fabric of reality, and that understanding this process is key to unlocking our potential for higher consciousness and spiritual evolution. He presents the technique of Bohmian Dialogue, developed by groundbreaking quantum physicist David Bohm, as one method for experiencing this powerful process. He also explores the mystery of synchronicity, offering a new understanding of the relationship between matter and mind and the underlying nature of reality.

The Origin of Consciousness in the Breakdown of the Bicameral Mind Julian Jaynes, 2000-08-15 National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

Radical Nature Christian de Quincey, 2010-02-22 An exploration of consciousness in all matter--from quantum to cosmos • Outlines theories of consciousness in ancient and modern philosophy from before Plato to Alfred North Whitehead • Reveals the importance of understanding mind-in-matter for our relationships with the environment, with other people, even with ourselves Are rocks conscious? Do animals or plants have souls? Can trees feel pleasure or pain? Where in the great unfolding of life did consciousness first appear? How we answer such questions can dramatically affect the way we live our lives, how we treat the world of nature, and even how we relate to our own bodies. In this new edition of the award-winning *Radical Nature*, Christian de Quincey explores the "hard problem" of philosophy--how mind and matter are related--and proposes a radical and surprising answer: that matter itself tingles with consciousness at the deepest level. It's there in the cells of every living creature, even in molecules and atoms. Tracing the lineage of this idea through Western philosophy and science, he shows that it has a very noble history--from before Plato to Alfred North Whitehead. He reveals that the way to God is through nature and that understanding how body and soul fit together has surprising consequences for our relationships with our environment, with other people, and even with ourselves.

The Reapers Are the Angels Alden Bell, 2010-08-03 Zombies have infested a fallen America. A young girl named Temple is

on the run. Haunted by her past and pursued by a killer, Temple is surrounded by death and danger, hoping to be set free. For twenty-five years, civilization has survived in meager enclaves, guarded against a plague of the dead. Temple wanders this blighted landscape, keeping to herself and keeping her demons inside her heart. She can't remember a time before the zombies, but she does remember an old man who took her in and the younger brother she cared for until the tragedy that set her on a personal journey toward redemption. Moving back and forth between the insulated remnants of society and the brutal frontier beyond, Temple must decide where ultimately to make a home and find the salvation she seeks. "Alden Bell provides an astonishing twist on the southern gothic: like Flannery O'Connor with zombies." —Michael Gruber, New York Times bestselling author of *The Book of Air and Shadows*

Ellen LaConte, 2010-10-01 LaConte's book offers a compelling answer to the now-universal question suggested by her subtitle. The global economy has gone viral. It is ravaging Earth's equivalent of an immune system the way HIV ravages the human immune system, triggering a Critical Mass of AIDS-like mutually reinforcing environmental, economic, social and political crises that are undermining the ability of human and natural communities to support, protect and heal themselves. LaConte's prognosis? Since Life rules, we don't, Life will last but Life as we know it—and a lot of us won't. LaConte shows that Life learned two billion years ago how to deal with pathological economies: it put them out of business. It encoded in other-than-human species a set of Economic Rules for Survival that allow them to live within Earth's means long term. In accessible prose LaConte explains how those rules can work for humans too. Recommended as a tool for community transition and cultural transformation, *Life Rules* offers a solution to our global crisis the publishers call authentically conservative, deeply Green, and profoundly liberating.

Zone One Colson Whitehead, 2011-10-18 NATIONAL BESTSELLER • From the two-time Pulitzer Prize-winning author of *The Underground Railroad* and *The Nickel Boys*: A pandemic has devastated the planet, sorting humanity into two types: the uninfected and the infected, the living and the living dead. • One of the best books of the year. —Esquire After the worst of the plague is over, armed forces stationed in Chinatown's Fort Wonton have successfully reclaimed the island south of Canal Street—aka Zone One. Mark Spitz is a member of one of the three-person civilian sweeper units tasked with clearing lower Manhattan of the remaining feral zombies. *Zone One* unfolds over three surreal days in which Spitz is occupied with the mundane mission of straggler removal, the rigors of Post-Apocalyptic Stress Disorder (PASD), and the impossible task of coming to terms with a fallen world. And then things start to go terribly wrong... At once a chilling horror story and a literary novel by a contemporary master, *Zone One* is a dazzling portrait of modern civilization in all its wretched, shambling glory. Look for Colson Whitehead's new novel, *Crook Manifesto*, coming soon!

The Encyclopedia of Angels Rosemary Guiley, 2004 An encyclopedia describing and giving the history of angels from the time when the earth was created forward, using texts from Hebrew, Arabic, ancient and contemporary works.

Warm Bodies Isaac Marion, 2012-12-25 Alienated from his fellow zombies because of his dislike of having to kill humans and his enjoyment of Sinatra music, R meets a living girl who sharply contrasts with his cold and dreary world and whom he resolves to protect in spite of her delicious appearance.

Soul Dust Nicholas Humphrey, 2012-11-11 A radically new view of the nature and purpose of consciousness How is consciousness possible? What biological purpose does it serve? And why do we value it so highly? In *Soul Dust*, the psychologist Nicholas Humphrey, a leading figure in consciousness research, proposes a startling new theory. Consciousness, he argues, is nothing less than a magical-mystery show that we stage for ourselves inside our own heads. This self-made show lights up the world for us and makes us feel special and transcendent. Thus consciousness paves the way for spirituality, and allows us, as human beings, to reap the rewards, and anxieties, of living in what Humphrey calls the soul niche. Tightly argued, intellectually gripping, and a joy to read, *Soul Dust* provides answers to the deepest questions. It shows how the problem of consciousness merges with questions that obsess us all—how life should be lived and the fear of death. Resting firmly on neuroscience and evolutionary theory, and drawing a wealth of insights from philosophy and literature, *Soul Dust* is an uncompromising yet life-affirming work—one that never loses sight of the majesty and wonder of consciousness.

Acedia: the Darkness Within Dave MacQuarrie MD PhD, 2012-11-29 There are many books written on the need to change consciousness but rarely does anyone explore the depths of humanity's refusal to do so, even under threat of the approaching cataclysm in our refusal to deal with climate change. Dave MacQuarrie has written such a book. In it, he explains both why it is so difficult for us to change and what all of us can do to become more aware and more free of the darkness within. It is a superb book. Jim Garrison, President and CEO of Ubiquity University, and author of *Civilization and the Transformation of Power*. *Acedia* is a well-informed and inspired book about the historical and psychological origins of a centuries old affliction. *Acedia* masterfully connects the dots between personal psychological traumas and looming environmental collapse. Dr. MacQuarrie pulls no punches, yet offers a ray of hope that we just might save our future. Christian de Quincey, PhD, Professor of Philosophy and Consciousness Studies, John F. Kennedy University, and author of *Radical Nature: The Soul of Matter*. This is a wise, searching book by an authentic scholar and seeker. It helps us enter into the darker waters of our crisis, and find their treasures of dark wisdom and endurance. Andrew Harvey, poet, mystical scholar, Founder/Director of the Institute of Sacred Activism, and author of *The Hope: A Guide to Sacred Activism*. Dr. MacQuarrie has lifted the ancient monastic curse of *acedia* out of its medieval tomb and applied it aptly to the dis-ease of the contemporary world. His interpretation of the human resistance is perceptive and provides important insights into our present inclination to repudiate

changes that demand action on our part. A serious and sensitive work. Father John-Julian, an Episcopal priest and contemplative monk, translator of Julian of Norwich's Revelations of Divine Love.

Bigger Than Bones Haley Jenkins, 2019-07-22 This volume was first published by Inter-Disciplinary Press in 2016. A murderer's hands are transplanted onto an innocent pianist, an asexual child's life is threatened by the world of sex and what really happens when pregnancy takes over a woman's body? Marginalization, eating disorders, altered bodies, breastfeeding, silent films, the truth behind angels and zombies, these topics are all explored in this exciting volume. Where do we draw the line between 'the body' and 'the other'? What does it really mean to meld the body with the biomechanical? Taking evidence from popular culture and well-known theorists worldwide, *Bigger Than Bones* explores how we are more than just our skeletal blueprint, that the body - and the perceptions of the body - give way to many layers of debate and inquiry. From being displaced by left-handedness to obtaining wings made from the dead, this collection provides a wide variety of material focused on the body's transformation, as well as the horror and the gifts it brings.

The Character of Consciousness David J. Chalmers, 2010-10-28 In this book David Chalmers follows up and extends his thoughts and arguments on the nature of consciousness that he first set forth in his groundbreaking 1996 book, *The Conscious Mind*.

Calling Upon Angels Rosemary Ellen Guiley, 2015-06-19 An introduction to the angel realm, their creation, purposes, and activities from ancient to modern times, plus how to contact and work with them.

BlindSpots Christian de Quincey, 2015-08-17 Examines 21 unquestioned assumptions that cloud our collective consciousness • Reveals faulty thinking and conceptual blindspots that distort beliefs in science, philosophy, and spirituality--from "the universe exploded from nothing in a Big Bang" to "we create our own reality" • Explains how "thought viruses" spread as we use these clichéd assumptions in our daily communications We live in a world filled with clichés--convenient assumptions and unquestioned conclusions that many of us use without giving them a second thought. We all spread these "thought viruses," infecting everyone we come in contact with. But many of these blindspots in how we think about ourselves and the world do not withstand rigorous scrutiny--or even casual scrutiny in some cases--yet they fall out of the mouths of scientists, religious teachers, journalists, and authors with dumbfounding frequency. Over the years philosopher Christian de Quincey spotted these cognitive gremlins in books, blogs, websites, TV shows, movies, classrooms, and casual conversations--and he wondered: Why do so many people speak before thinking, spreading ideas that make no sense, yet fool us into thinking they do? How did these unquestioned beliefs about life, space, time, energy, consciousness, evolution, artificial intelligence, and even God take hold in our collective consciousness? In this book, de Quincey deliberately provokes and illuminates the dark side of jumping to conclusions, casting a skeptical eye on 21 beliefs that keep science, philosophy, and spirituality in the dark--from "the universe exploded from nothing in a Big Bang" and "we create our own reality" to "nobody

knows what consciousness is” and “everything is energy.” These ideas distort and block our understanding and openness to important questions about life, the universe, mind, matter, God, and the miraculous. By exposing these thought viruses that take our minds hostage when we fail to think things through, de Quincey aims to help change the way we think not just about thinking but also about how we live our lives, interact with others, and contemplate the world around us.

Betrays Lili St. Crow,2009-11-04 The second novel in the Strange Angels series picks up with Dru neatly tucked away in a Schola that's more like a prison than a secret training facility. But a traitor in the Order wants Dru dead and she can't trust anyone except for Graves. Too bad he's being kept busy with a new crew of wulfen teens and doesn't have time for her. As she learns the truth about who she can and can't trust, Dru's only hope may be to save herself - although the one gift that makes her special is draining away, and she doesn't know how to get it back. Will Dru survive long enough to find out who is really after her? Or is she destined for the same fate as her murdered parents? Lili's characters come alive on the page in a way that's visually stunning and she creates the same terrific pace, danger and teen romance as in Strange Angels.

The Cosmic Spirit Roland Faber,2021-03-04 Are we more than stardust? Is the appearance of the fragile Earth in the vast universe more than an accident? Supernormal Dean Radin PhD, 2013-07-16 Can yoga and meditation unleash our inherent supernatural mental powers, such as telepathy, clairvoyance, and precognition? Is it really possible to perceive another person's thoughts and intentions? Influence objects with our minds? Envision future events? And is it possible that some of the superpowers described in ancient legends, science fiction, and comic books are actually real, and patiently waiting for us behind the scenes? Are we now poised for an evolutionary trigger to pull the switch and release our full potentials? Dean Radin, Director of Research at the Institute of Noetic Sciences (IONS) and bestselling author of *The Conscious Universe*, presents persuasive new experimental evidence for the existence of such phenomena. He takes us on a thrilling scientific journey and challenges outdated assumptions that these abilities are mere superstition. Focusing on Patanjali's mysterious Yoga Sutras -- 2,000 year-old meditation practices believed to release our extraordinary powers -- Radin offers powerful evidence confirming that sometimes fact is much stranger, spookier, and more wonderful than the wildest fiction.
