Sociocultural Situatedness Roslyn M. Frank, René Dirven, Tom Ziemke, Enrique Bernárdez, 2008-08-27 The contributions contained in the second volume of the two-volume set *Body, Language and Mind* introduce and elaborate upon the concept of sociocultural situatedness, understood broadly as the way in which minds and cognitive processes are shaped, both individually and collectively, by their interaction with socioculturally contextualized structures and practices; and, furthermore, how these structures interact, contextually, with language and can become embodied in it. Drawing on theoretical concepts and analytical tools within the purview of cognitive linguistics and related fields, the volume explores the relationship between body, language and mind, focusing on the complex mutually reinforcing relationships holding between the sociocultural contextualisation of language and, inversely, the linguistic contextualisation of culture. Stated differently, the notion of sociocultural situatedness allows for language to be seen as a cultural activity and at the same time as a subtle mechanism for organizing culture and thought. The volume offers a representative, multi- and interdisciplinary collection of new papers on sociocultural situatedness, bringing together for the first time a wide variety of perspectives and case studies directed explicitly to elucidating the analytical potential of this concept for cognitive linguists and other researchers working in allied fields such as AI, discourse studies and cognitive anthropology. The book brings together several core issues related to the notion of sociocultural situatedness, some of which have been addressed previously, although to a large degree sporadically and from a variety of disciplinary perspectives without fully exploring the possible

analytical advantages of this concept as a tool for investigating the role of culturally entrenched schemata in cognition and language. In short, this is the first comprehensive survey of sociocultural situatedness theory.

Sex, Gender, and Science M. Hird,2004-11-05 In Sex, Gender and Science , Myra Hird outlines the social study of science and nature, specifically in relation to 'sex', sex 'differences' and sexuality. She examines how Western understandings of 'sex' are based less upon understanding material sex differences, than on a discourse that emphasizes sex dichotomy over sex diversity and argues for a feminist engagement with scientific debate that embraces the diversity and complexity of nature.

Musical Meaning Lawrence Kramer,2021-06-22 Ranging widely over classical music, jazz, popular music, and film and television music, Musical Meaning uncovers the historical importance of asking about meaning in the lived experience of musical works, styles, and performances. Lawrence Kramer has been a pivotal figure in the development of new resources for understanding music. In this accessible and eloquently written book, he argues boldly that humanistic, not just technical, meaning is a basic force in music history and an indispensable factor in how, where, and when music is heard. He demonstrates that thinking about music can become a vital means of thinking about general questions of meaning, subjectivity, and value. First published in 2001, Musical Meaning anticipates many of the musicological topics of today, including race, performance, embodiment, and media. In addition, Kramer explores music itself as a source of understanding via his composition Revenants for piano, revised for this edition and available on the UC Press website.

Disruptive Possibilities: How Big Data Changes Everything Jeffrey Needham,2013-05-06 Big data has more disruptive potential than any information technology developed in the past 40 years. As author Jeffrey Needham points out in this revealing book, big data can provide unprecedented visibility into the operational efficiency of enterprises and agencies. Disruptive Possibilities provides an historically-informed overview through a wide range of topics, from the evolution of commodity supercomputing and the simplicity of big data technology, to the ways conventional clouds differ from Hadoop analytics clouds. This relentlessly innovative form of computing will soon become standard practice for organizations of any size attempting to derive insight from the tsunami of data engulfing them. Replacing legacy silos—whether they're infrastructure, organizational, or vendor silos—with a platform-centric perspective is just one of the big stories of big data. To reap maximum value from the myriad forms of data, organizations and vendors will have to adopt highly collaborative habits and methodologies.

The Dark Valley Valerio Varesi,2012-02-02 Commissario Soneri returns home for a hard-earned autumn holiday, hoping

to spend a few days mushroom picking on the slopes of Montelupo. This isolated village relies on the salame factory founded in the post-war years by Palmiro Rodolfi, and now run by his son, Paride. On arrival, Soneri is greeted by anxious rumours about the factory's solvency and the younger Rodolfi's whereabouts. Not long afterwards, a decomposing body is found in the woods. In the shadow of Montelupo, carabinieri prepare to apprehend their chief suspect - an ageing woodsman who defended the same mountains from S.S. commandos during the war.

With a nervous mother, a dreamer for a father and an obsessive piano player for a little brother, she finds herself living a double life: one as a good daughter, the other on an erotic journey that will change her forever. 'While the Shark is Sleeping is an enchanting story of the loss of innocence and the desire to be loved. Extraordinary and startling' Grazia 'The most irresistible, untamed and imaginative sex' writer today' Il Corriere della Sera

Psychosomatic Elizabeth A. Wilson, 2004-06-16 How can scientific theories contribute to contemporary accounts of embodiment in the humanities and social sciences? In particular, how does neuroscientific research facilitate new approaches to theories of mind and body? Feminists have frequently criticized the neurosciences for biological reductionism, yet, Elizabeth A. Wilson argues, neurological theories—especially certain accounts of depression, sexuality, and emotion—are useful to feminist theories of the body. Rather than pointing toward the conventionalizing tendencies of the neurosciences, Wilson emphasizes their capacity for reinvention and transformation. Focusing on the details of neuronal connections, subcortical pathways, and reflex actions, she suggests that the central and peripheral nervous systems are powerfully allied with sexuality, the affects, emotional states, cognitive appetites, and other organs and bodies in ways not fully appreciated in the feminist literature. Whether reflecting on Simon LeVay's hypothesis about the brains of gay men, Peter Kramer's model of depression, or Charles Darwin's account of trembling and blushing, Wilson is able to show how the neurosciences can be used to reinvigorate feminist theories of the body.

The Other Woman Jane Green, 2006-06-06 From the New York Times bestselling author of *Falling* and *Sister Stardust* comes a novel about marrying your dream man—and his mother. When Ellie meets Dan, she thinks she's found the perfect man, complete with a loving, close-knit family. Having lost her own mother young, Ellie looks forward to gaining the mother she never had. But first signs of trouble appear when their intimate civil wedding ceremony is transformed into a full-fledged black-tie affair, and Ellie starts to wonder if Dan's boundary-hating mother, Linda, might be a little too involved. As troubles between them mount, Ellie turns to her friends—glamorous Lisa and wonderful frazzled Trish—to help her recapture the independence she once had, and the man she still loves. But having her own child makes Ellie realize that the unconditional, sometimes overwhelming love of a mother is something that can't—and shouldn't—be ignored...

Couple Mechanics Nelly Alard, 2016-01-19 At once sexy and feminist, this is a story of a woman who decides to fight for her marriage after her husband confesses to an affair with a notable politician Juliette, a computer engineer, and Olivier, a journalist, have two young children and the busy lives of a modern Parisian couple. On a beautiful spring day, while sitting by the river watching her children play, Juliette's cell phone rings. It is her husband. When Olivier confesses to having an affair, Juliette's world is shattered. How do you survive betrayal? Can a couple ever be united again? What lengths would you go to in order to save your marriage? These are the questions that this novel, with great intelligence, honesty, and humor, tries to answer. In its acute depiction of intimacy, *Couple Mechanics* exposes the system of forces at work in a marriage, the effects of the inevitable ebb and flow of desire, and the difficulty of being a man today.

Tell Me Another Morning Zdena Berger, 2007-04 As she witnesses atrocities and is transported between Terezin, Auschwitz, and Bergen-Belsen as a prisoner, Jewish teenager Tania holds on to her hope of being rescued; but once she is freed, she cannot readjust to life outside of the concentration camps.

Echo's Sister Paul Mosier, 2018-08-07 From critically acclaimed author Paul Mosier, a Publishers Weekly Flying Start, comes a stunning story about the beauty of family, the power of community, and ultimately the strength of the human spirit. She won't even have time to think about all the fun her old friends are having without her. Everything will be great. But when her dad picks her up after school and tells her that her younger sister, Echo, has a life-threatening illness, her world is suddenly turned upside down. And with her parents now pressed for time and money, El feels lost and powerless. Then she befriends Octavius, the only other kid in school who gets what she's going through. The Nighttime Book Mauri Kunnas, Tarja Kunnas, 1985 As little Annie's family goes to bed to sleep, others in Dog Dell dance at a nightclub, print the newspaper, control air traffic, worry about the next day, and engage in other nighttime activities.

The Living Infinite Chantel Acevedo, 2017 *The Living Infinite* is based on the true story of the Spanish princess Eulalia, an outspoken firebrand at the Bourbon court during the troubled and decadent final years of her family's reign. After her cloistered childhood at the Spanish court, her youth spent in exile, and a loveless marriage, Eulalia gladly departs Europe for the New World. In the company of Thomas Aragon, the son of her one-time wet nurse and a small-town bookseller with a thirst for adventure, she travels by ship first to a Cuba bubbling with revolutionary fervor then on to the 1893 Chicago World

Fair. As far as others are concerned, she is there as an emissary of the Bourbon dynasty and a guest of the Fair. Secretly, she is in America to find a publisher for her scandalous, incendiary autobiography, a book that might well turn the old world order on its head. Acevedo's new novel is an atmospheric and gripping tale of love, adventure, power and the quest to take control of one's destiny. Bourbon Spain, Revolutionary Cuba, and fin de siècle America are vividly rendered and Eulalia's personal rebellion will resonate with many readers.

Daddy's Wings Milena Agus, 2011 In Milena Agus' radiant Sardinia, Madame owns a piece of land by the sea which property developers are after. But Madame doesn't want to sell and therefore prevents her neighbours and other locals from cashing in. Even so, they can't help loving her for her generous and candid way of being. A fourteen year old girl tells the story through an imagination that shapes reality: her missing father appears in the slight movements of the air (Daddy's wings), and sharp scenes of hardcore sex seem to take place in Madame's house at night. It is a comic and truculent story, fairytale-like and true — as are all Milena Agus' works. Most of all, it is the story of love affairs that go somewhat awry but still manage to go on, which is the most important thing.
