Making Eye Health a Population Health Imperative National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Public Health Approaches to Reduce Vision Impairment and Promote Eye Health, 2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. *Making Eye Health a Population Health Imperative: Vision for Tomorrow* proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

Self-Determined Learning Stewart Hase, Chris Kenyon, 2013-09-26 Heutagogy, or self-determined learning, redefines how we understand learning and provides some exciting opportunities for educators. It is a novel approach to educational practice, drawing on familiar concepts such as constructivism, capability, andragogy and complexity theory. Heutagogy is also supported by a substantial and growing body of neuroscience research. *Self-Determined Learning* explores how heutagogy was derived, and what this approach to learning involves, drawing on recent research and practical applications.

The editors draw together contributions from educators and practitioners in different fields, illustrating how the approach can be used and the benefits its use has produced. The subjects discussed include: the nature of learning, heutagogy in the classroom, flexible curriculum, assessment, e-learning, reflective learning, action learning and research, and heutagogy in professional practice settings.

Structured Discovery Cane Travel Approach to Orientation and Mobility Concepts Merry-Noel Chamberlain, 2024-01-01 Structured Discovery Cane Travel Approach to Orientation and Mobility Concepts is a collection of skill-building fundamental techniques essential to develop mobility independence for students who are blind or visually impaired. This book dives into transformational mobility concepts followed by a trove of tried-and-true necessary and efficient activities to enhance students' abilities to improve problem-solving skills within natural environments while using a long white cane with a metal tip as the primary mobility tool. Since Structured Discovery Cane Travel is individualized, this activity-based collection may be used to enhance introduction to and/or assistance with on-going education of comprehending complicated concrete and abstract Orientation and Mobility concepts to help achieve independent mobility. Structured Discovery Cane Travel Approach to Orientation and Mobility Concepts focuses on encouraging students to develop intrinsic knowledge and abilities through this plethora of activity-based transformational approaches to target individual objectives. These activities logically transpire through direct exposure and/or teachable moments to hand-on experiences to help students create mental mapping skills of

their surroundings which can then be utilized in novel or unfamiliar environments. Used in conjunction with *The ABCs of Structured Discovery Cane Travel for Children*, by Merry-Noel Chamberlain, parents and instructors of children who are blind or visually impaired will be able to comprehend and instruct O&M essentials using this vault of O&M activities.

Nothing About Us Without Us James I. Charlton,1998-03-27 James Charlton has produced a ringing indictment of disability oppression, which, he says, is rooted in degradation, dependency, and powerlessness and is experienced in some form by five hundred million persons throughout the world who have physical, sensory, cognitive, or developmental disabilities. *Nothing About Us Without Us* is the first book in the literature on disability to provide a theoretical overview of disability oppression that shows its similarities to, and differences from, racism, sexism, and colonialism. Charlton's analysis is illuminated by interviews he conducted over a ten-year period with disability rights activists throughout the Third World, Europe, and the United States. Charlton finds an antidote for dependency and powerlessness in the resistance to disability oppression that is emerging worldwide. His interviews contain striking stories of self-reliance and empowerment evoking the new consciousness of disability rights activists. As a latecomer among the world's liberation movements, the disability rights movement will gain visibility and momentum from Charlton's elucidation of its history and its political philosophy of self-determination, which is captured in the title of his book. *Nothing About Us Without Us* expresses the conviction of people with disabilities that they know what is best for them. Charlton's combination of personal involvement and theoretical awareness assures greater understanding of the disability rights movement.

The ABCs of Structured Discovery Cane Travel for Children Merry-Noel Chamberlain,2021-06-01 Structured Discovery Cane Travel (SDCT) is an Orientation and Mobility (O&M) curriculum which focuses on the foundational techniques necessary to develop future independence for students who are blind or visually impaired. *The ABCs of Structured Discovery Cane Travel for Children* addresses essential non-visual concept development, techniques and mobility skills needed to travel efficiently, gracefully and safely within a myriad of natural environments while using the long, white cane with a metal tip as the primary mobility tool. This curriculum utilizes transformational knowledge and problem-solving opportunities through teachable moments to develop personal reflection and mental mapping which can be utilized post instruction. These students maximize their cognitive intrinsic feedback while completing everyday mobility tasks. Parents and instructors of children who are blind or visually impaired will comprehend the essentials of SDCT by reading *The ABCs of Structured Discovery Cane Travel for Children*; in addition, they will receive a treasure trove of O&M skill-building activities.

Decolonization, Self-Determination, and the Rise of Global Human Rights Politics A. Dirk Moses, Marco Duranti, Roland Burke, 2020-07-16 Leading scholars demonstrate how colonial subjects, national liberation movements, and empires mobilized human rights language to contest self-determination during decolonization.

ECC Essentials Carol B. Allman, 2014-07 *ECC Essentials: Teaching the Expanded Core Curriculum to Students with Visual Impairments* is the first comprehensive book for teachers of students with visual impairments to focus on the nine areas of the ECC that encompass the unique skills children and adolescents with visual impairments need to learn in order to access the core educational curriculum and become independent individuals, by providing the rationale, suggestions, and strategies necessary to implement instruction. The nine areas include compensatory access, sensory efficiency, assistive technology, orientation and mobility, independent living, social interaction, recreation and leisure, career education, and self-determination. *ECC Essentials* helps teachers manage time efficiently and effectively; work with students of different ages and ability levels; collaborate with parents and other members of the educational team; conduct assessments; align instruction with state standards and the general education core curriculum; and maximize planning effectiveness. The book includes learning activities that combine several areas of the ECC; information about additional resources; specific guidelines and strategies for teaching each of the nine areas of the ECC. *ECC Essentials* provides teachers with a road map for helping their students achieve success in school and in life.

Development of Self-Determination Through the Life-Course Michael L. Wehmeyer, Karrie A. Shogren, Todd D. Little, Shane J. Lopez, 2017-02-16 This volume examines the developmental aspects of the general psychological construct of self-determination. The term refers to self- (vs. other-) caused action—to people acting volitionally—as based on their own will. Research conducted in the fields of psychology and education shows the importance of self-determination to adolescent development and positive adult outcomes. The first part of this volume presents an overview of theories and historical antecedents of the construct. It looks at the role of self-determination in major theories of human agentic behavior and of adolescent development and individuation. The second part of the volume examines the developmental origins and the trajectory of self-determination in childhood, adolescence, and adulthood, and looks at aging aspects. The next part presents studies on the evolutionary aspects, individual differences and healthy psychological development. The last part of the book covers the development of causal and agentic capability.

Assistive Technology for Visually Impaired and Blind People Marion Hersh, Michael A Johnson, 2010-05-12 Equal accessibility to public places and services is now required by law in many countries. For the vision-impaired, specialised technology often can provide a fuller enjoyment of the facilities of society, from large scale meetings and public entertainments to reading a book or making music. This volume explores the engineering and design principles and

techniques used in assistive technology for blind and vision-impaired people. This book maintains the currency of knowledge for engineers and health workers who develop devices and services for people with sight loss, and is an excellent source of reference for students of assistive technology and rehabilitation.

The Universal Declaration of Human Rights in the 21st Century Gordon Brown, 2016-04-18 The Global Citizenship Commission was convened, under the leadership of former British Prime Minister Gordon Brown and the auspices of NYU's Global Institute for Advanced Study, to re-examine the spirit and stirring words of The Universal Declaration of Human Rights. The result - this volume - offers a 21st-century commentary on the original document, furthering the work of human rights and illuminating the ideal of global citizenship. What does it mean for each of us to be members of a global community? Since 1948, the Declaration has stood as a beacon and a standard for a better world. Yet the work of making its ideals real is far from over. Hideous and systemic human rights abuses continue to be perpetrated at an alarming rate around the world. Too many people, particularly those in power, are hostile to human rights or indifferent to their claims. Meanwhile, our global interdependence deepens. Bringing together world leaders and thinkers in the fields of politics, ethics, and philosophy, the Commission set out to develop a common understanding of the meaning of global citizenship - one that arises from basic human rights and empowers every individual in the world. This landmark report affirms the Universal Declaration of Human Rights and seeks to renew the 1948 enterprise, and the very ideal of the human family, for our day and generation.

Red Pedagogy Sandy Grande, 2015-09-28 This ground-breaking text explores the intersection between dominant modes of critical educational theory and the socio-political landscape of American Indian education. Grande asserts that, with few exceptions, the matters of Indigenous people and Indian education have been either largely ignored or indiscriminately absorbed within critical theories of education. Furthermore, American Indian scholars and educators have largely resisted engagement with critical educational theory, tending to concentrate instead on the production of historical monographs, ethnographic studies, tribally-centered curricula, and site-based research. Such a focus stems from the fact that most American Indian scholars feel compelled to address the socio-economic urgencies of their own communities, against which engagement in abstract theory appears to be a luxury of the academic elite. While the author acknowledges the dire need for practical-community based research, she maintains that the global encroachment on Indigenous lands, resources, cultures and communities points to the equally urgent need to develop transcendent theories of decolonization and to build broad-based coalitions.

Militant Democracy András Sajó, Lorri Rutt Bentch, 2004 This book is a collection of contributions by leading scholars on theoretical and contemporary problems of militant democracy. The term 'militant democracy' was first coined in 1937. In a militant democracy preventive measures are aimed, at least in practice, at restricting people who would openly contest and

challenge democratic institutions and fundamental preconditions of democracy like secularism - even though such persons act within the existing limits of, and rely on the rights offered by, democracy. In the shadow of the current wars on terrorism, which can also involve rights restrictions, the overlapping though distinct problem of militant democracy seems to be lost, notwithstanding its importance for emerging and established democracies. This volume will be of particular significance outside the German-speaking world, since the bulk of the relevant literature on militant democracy is in the German language. The book is of interest to academics in the field of law, political studies and constitutionalism.

Neurosis and Human Growth Karen Horney, 2013-09-13 In *Neurosis and Human Growth*, Dr. Horney discusses the neurotic process as a special form of the human development, the antithesis of healthy growth. She unfolds the different stages of this situation, describing neurotic claims, the tyranny or inner dictates and the neurotic's solutions for relieving the tensions of conflict in such emotional attitudes as domination, self-effacement, dependency, or resignation. Throughout, she outlines with penetrating insight the forces that work for and against the person's realization of his or her potentialities. First Published in 1950. Routledge is an imprint of Taylor & Francis, an informa company.

The Last Utopia Samuel Moyn, 2012-03-05 Human rights offer a vision of international justice that today's idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book, Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal's troubled present and uncertain future. For some, human rights stretch back to the dawn of Western civilization, the age of the American and French Revolutions, or the post-World War II moment when the Universal Declaration of Human Rights was framed. Revisiting these episodes in a dramatic tour of humanity's moral history, *The Last Utopia* shows that it was in the decade after 1968 that human rights began to make sense to broad communities of people as the proper cause of justice. Across eastern and western Europe, as well as throughout the United States and Latin America, human rights crystallized in a few short years as social activism and political rhetoric moved it from the hallways of the United Nations to the global forefront. It was on the ruins of earlier political utopias, Moyn argues, that human rights achieved contemporary prominence. The morality of individual rights substituted for the soiled political dreams of revolutionary communism and nationalism as international law became an

alternative to popular struggle and bloody violence. But as the ideal of human rights enters into rival political agendas, it requires more vigilance and scrutiny than when it became the watchword of our hopes.

Bilingual and ESL Classrooms Carlos Julio Ovando, Virginia P. Collier, Mary Carol Combs, 2005-07 This classic text integrates theory and practice to provide comprehensive coverage of bilingual and ESL education. The text covers the foundations of bilingual and ESL education (who the students are, what the policies are and have been, the role and development of language and culture) and provides a strong focus on what the teacher needs to know in a bilingual classroom (such as instruction strategies, teaching in content areas, assessment, and working with students with special needs). Woven throughout the text are quotes from bilingual and ESL students and teachers that illuminate the bilingual/ESL learning and teaching experience.
